Subject: case 09/879792

Hi,

I would like to request the following searches (Xiao et al.):

1. a standard search of seq id 11 and 12 in the nucleic acid databases (commercial and interference)
2. a standard search of seq id 12 in the protein databases (commercial and interference)
3. an oligo search of seq id 11 in the nucleic acid databases (commercial)

Thank you,

Delia M. Ramirez, Ph.D.

Pending Nucleic Acid and/or Pending Amino Acid database searches now generate two sets of results. These databases were split into two parts to reduce the time needed to update the databases daily. The split freed up more machine time for processing searches.

Searches run against the Nucleic Acid Pending database produce two sets of results, with the extensions, .rnpm and .rnpn

Searches run against the Amino Acid Pending database produce two sets of results, with the extensions, .rapm and .rapn

The Pending database search results should not be left in the case because they contain data that is confidential.
